

General Purpose Inflatable Workboats

3.8m, 4.2m, 4.7m, 5.3m & 6.0m

DSB Inflatable Boats

- **Robust**
- **Durable**
- **Reliable**
- **Versatile**
- **& Safe**

The DSB General Purpose Workboats

were developed for use by the armed forces, disaster control organisations and commercial shipping companies, and so meet the most exacting demands.

Their robustness, durability, reliability, and versatility coupled with a design that seeks to provide a safe boat even in the most adverse conditions make this a boat suitable for many roles.

The buoyancy tubes are constructed from UV resistant Hypalon with independent air chambers and safe, flush valves. Where required accessory items such as handles, ropes, etc can be customised.

The internal floor is constructed of heavy duty marine ply with a non-slip coating. For the 3.8m boat there is the option of a fast deployment wooden 'roll-up' floor.

DSB 380

- Workboat
- Safety Boat
- Fishing
- Assault Boat
- Diving
- Skiing
- Tender

Standard Equipment

Wooden non-slip floor, Drain valves, Lifelines, Heavy duty rubbing strake, Carry handles, Towing points at bow and stern, Paddles, Bellows, Repair kit & Valise.

Optional Equipment

Quick-fit lightweight roll-up floor, Bow cover (removable), Windscreen, Seats, Hoisting fittings, Lifting sling, Boat cover, etc.
