

*Quality materials are used in the construction of our Marina Safety Station which is ideal for use on pontoons, quaysides, landing stages, waterfronts and similar locations*

# Marina Safety Station

The core components of our **Marina Safety Station** are:

- a strong non-corrosive quality GRP pole with cap,
- an ABS weathertight (IP54) fire extinguisher cabinet with a clear polycarbonate door,
- snatch grips for securing a lifebuoy

Core Options

- If a fire extinguisher cabinet is not required the post may simply be fitted with a lifebuoy and line

Within the core supply there is a choice of securing arrangements and pole height:

- \* "standard" with drilled baseplate (height 1029mm / wt 4.4kg)
- \* "tall" with drilled baseplate (height 1569mm / 5.1kg)
- \* for both of the above longer poles without a footplate can be provided for embedding in the ground.

Width (without lifebuoy)

Pole only 60mm (dia). Baseplate 200mm (dia).  
Extinguisher Cabinet backplate 335mm.

Optional extras include:

- fire extinguisher
- lifebuoy 22" or 30" c/w grablines & retro-reflective tape
- rescue line (encapsulated) 20m or 30m
- other items to suit your particular need

The safety items may be located on either side of the GRP pole or, if greater visibility is required or space is at a premium the longer pole may be used and the components mounted vertically.

### Extinguisher Cabinet

The cabinet is suitable for stowing a standard 9 l. / 9 kg fire extinguisher, or other equipment (e.g torpedo buoy, first aid kit, etc.) as required.

Body - Red ABS/GRP

Door - Tough clear polycarbonate with rubber EPDM seal, and the facility to incorporate a security (tamper indicating)

Seal - Rubber EPDM

Dimensions - 762 x 282 x 211 / Wt. 4kg

Fire Extinguisher & Lifebuoy with Encapsulated Rescue Line
